

Inventory Management

With services spanning six continents in more than 100 countries, we provide the right parts, where and when customers need them — anywhere in the world.

Our inventory accuracy is greater than 99.9 percent. Our strategically located distribution centers and stocking locations are already in place where customers need them, and our software is proven on the global stage.

Optimize Your Inventory Management.

Too much inventory ties up working capital. Too little jeopardizes uptime and productivity. Our inventory management services, enabled by our singular, global proprietary system and best-in-class dashboards and mobile tools, ensure you have the parts or products you need — where and when you need them — and at the lowest possible cost.

Choice delivers world class accuracy while affording our clients unparalleled transparency, 360-degree visibility, control and optimization. We manage all client-owned or controlled inventory, including brick and mortar, service centers, hubs, storage lockers, as well as other 3rd Party providers or consignment locations. Whether finished goods, spare parts or defective returns, Choice is capable of meeting your stringent requirements via our superior serialization, min/max, auto-replenishment, and FIFO management capabilities.

Our clients benefit from:

- Avoidance of Stock Outs
- Reduced Risk of Obsolescence
- Significant Cost Savings
- Intelligent Decision Support
- Better Visibility Across their Supply Chains
