# Enterprise Solutions

We customize proven business practices, embed innovation for differentiation, and facilitate staged deployment across global operations to maximize benefits and manage risk.

## OVERVIEW

Choice's Enterprise Solutions Team leverages people, process, and technology to drive a desired business outcome. We adhere to industry vertical specific processes within regulatory and compliance boundaries to quickly and seamlessly convert issues to a competitive advantage.

Some key tenets of our Enterprise Solutions Team include:

- Developing streamlined, industry-specific processes.
- Implementing end-to-end business solutions.
- Leveraging collaborative technologies.
- Embedding business analytics for decision support.
- Providing seamless deployment in a staged or globally integrated approach.

## AREAS OF INVESTIGATION

The Enterprise Solutions Team evaluates your entire supply-chain to uncover areas that are preventing you from scaling and reaching your true potential. We look at your entire network (internal and external) to understand your strengths, weaknesses, opportunities, and bottlenecks to growth. We start by understanding your customer requirements and SLA's and project forward based on your changing business requirements to ensure we are designing a solution for the long-term.

Areas of investigation includes:

- Inventory analysis
- Transportation analysis
- System analysis
- Performance analysis
- Spend analysis

## PROOF POSITIVE

“Choice is a true business partner. They have a phenomenal ability to bring solutions forward. Their execution is consistent and they take nothing for granted.”

— F500 Computer Manufacturer

“Choice has a depth of capabilities that we haven’t found anywhere else. Their investment in technology and the network, combined with their collaborative approach has been key to our success.”

— F500 Telecom Company

“Choice continues to impress us with their knowledge and understanding of our industry. Their flexibility and attention to detail is unsurpassed, allowing our field engineers to focus on their jobs.”

— F500 Office Equipment Company

## VALUE PROPOSITION

Choice takes a holistic approach to issue identification and resolution. Throughout the process, we recommend various options that adhere to your timing and budgetary constraints.

Our clients have enjoyed numerous enhancements, including, but not limited to:

- Cross-functional, closed-loop design
- Differentiation in the market place
- Reduced time to market
- Improved performance
- Reduced spend

## GETTING STARTED

We begin with a free whiteboard session with the key stakeholders to understand the scope and objectives of the engagement. From there we conduct a 4 to 6 week diagnostic to collect data, interview participants, and develop/test potential hypotheses to identify key success factors. Choice employs a proprietary and proven “Define, Design, Develop, and Deploy” stage gate process to ensure you have input every step of the way.

Learn why industry leaders trust Choice Logistics for enterprise-grade supply-chain solutions that compress time-to-market, provide differentiation, and remove costs.
