

CHOICELOGISTICS
ONE WORLD • ONE CHOICE

Managed Services

When the world's leading companies need a reliable partner to manage multiple service providers, they turn to Choice.

OVERVIEW

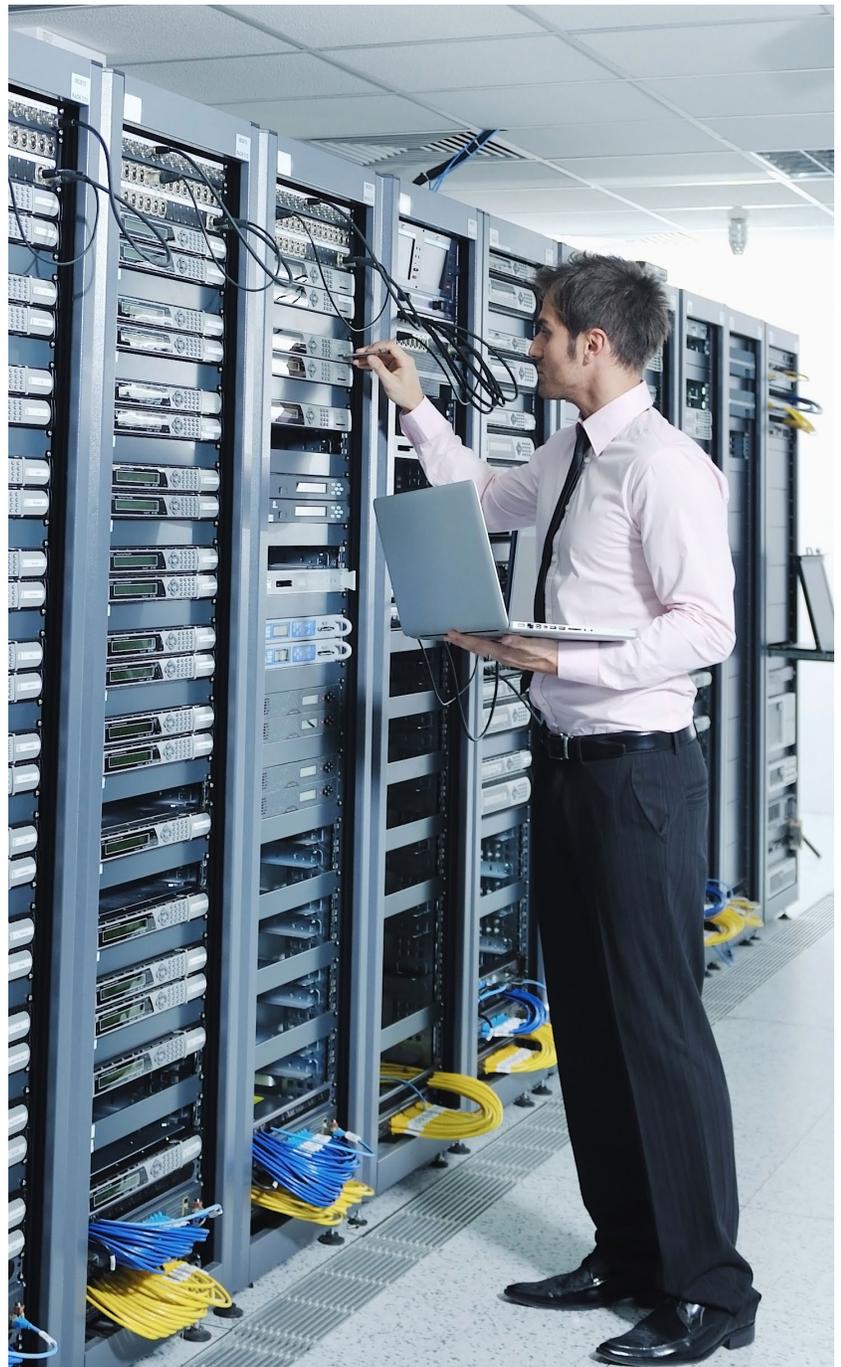

As the complexity of supply-chains continues to increase, companies are challenged with minimizing costs while improving performance. The value of outsourcing certain processes is well documented; however, companies are looking to further streamline their operations. One method is to integrate processes and allow a single provider manage day-to-day operations to drive a specific outcome. To that end, companies continue to turn to Choice for services other than logistics.

SERVICES

Choice manages hundreds of regional and global service providers around the world. We have vetted and selected vendors that are leaders in their respective industries. Many of the vendors are also our clients.

Choice's portfolio of managed services include:

- Parts planning
- Field engineering
- Software/hardware configuration
- Depot repair
- Asset recovery

VALUE PROPOSITION

Choice exists to solve your greatest challenges. We focus on getting to YES. Our intent is not to be all things to all companies, but rather to manage complementary aspects of your business so you can focus on what you do best.

Benefits of leveraging Choice's capabilities include:

- Turn-key solutions
- Best-in-class tool sets
- Reduced process steps
- Integrated offering
- Lower administration costs

GETTING STARTED

Like all client engagements, Choice begins with defining the scope of the project. Are you seeking to streamline operations, reduce costs, improve overall performance, migrate to a common platform for increased transparency, or all of the above? Choice will conduct a whiteboard session to identify the critical success factors and provide a roadmap to success. We are involved every step of the way to ensure the implementation is flawless. Call us today and transform your supply-chain into a competitive advantage.

Learn why industry leaders trust Choice Logistics for enterprise-grade supply-chain solutions that compress time-to-market, provide differentiation, and remove costs.
