

Choice Logistics Hires Global Leaders; Positioned for Growth

NEW YORK, NEW YORK – March 12, 2015 – Choice Logistics, the leading provider of enterprise-grade supply-chain solutions, today announced the hiring of seven senior leaders from blue-chip corporations. Each strategic hire was for a different position and each resides in a different global market.

"Over the last 6 months Choice has been aggressively hiring the best supply-chain professionals in the business," said Michael Katz, CEO of Choice Logistics. "I felt this was newsworthy because these hires dramatically enhance our capabilities and are leading directly to new business opportunities."

The new hires include Director and Vice President-level positions based in the Americas, EMEA, and Asia-Pacific. The roles include business development, enterprise solutions, global trade, customer service, and field operations. These senior hires joined Choice from such companies as Arrow Electronics, Flextronics, Honeywell, and UPS.

"Choice assists the world's most demanding companies by helping them keep their promises," Katz continued. "We focus on hiring and retaining the best and the brightest. This requires a dynamic culture that supports top-performers in delivering outstanding results. Choice accomplishes this through a combination of skills development, on-the-job training, and cross-functional collaboration."

"Our global footprint grew by more than 10% last year, but more importantly, we've added 6 new supply chain services, each of which requires a proven leader," said Katz. "Our success has always been driven by talented people capable of developing unique solutions. What's so exciting is that these additions to the Choice family allow us to serve our clients in new and exciting ways."

About Choice Logistics

For more than 50 years, Choice has helped the world's leading companies better manage their global supply chains. We offer enterprise grade warehouse, inventory, and transportation management solutions through our global footprint of 400 stocking locations, regional distribution centers, and transportation hubs in more than 80 countries. Beyond 3PL services, Choice offers global trade, parts planning, field engineering, depot repair, and asset recovery support. Companies turn to Choice to compress time to market, provide differentiation in the market place, and remove costs.
